

Justin Matthew Newman

+1 (804) 832-9881 | Fairfax, VA | newma4jm@gmail.com | newmanjustin.com

TECHNICAL SKILLS

Languages	C#, JavaScript, SQL, Python3
Frameworks	React.js, Tailwind CSS, Hero UI
Tools & Cloud	Git, REDIS, Linux CLI, AWS EC2/S3, Azure, Vercel
Concepts	Agile/Scrum, Software design patterns and best practices

EDUCATION

James Madison University *Graduation: May 2023*

Bachelor of Science in Computer Science | Minor: Data Analytics

President's List (Spring 2022) | **Dean's List** (Fall 2022, Spring 2023)

Relevant Coursework: Applied Algorithms, Software Engineering, Computer Systems II, Parallel & Distributed Systems, Database Systems, Machine Learning, Web Development, Linear Algebra, Statistics, Discrete Structures II

PROFESSIONAL EXPERIENCE

Junior Software Developer — ECS Limited *Dec 2024 - Present*

C# · JavaScript · SQL

- Resolved 400+ support tickets while actively consulting with BSA to ensure solutions satisfy both the business and users.
- Delivered several custom reporting solutions by implementing and thoroughly testing LINQ/SQL queries and procedures.
- Designed and implemented reusable caching service in the ECS Ethel .NET MAUI mobile application, reducing redundant network calls, eliminating hardcoded logic, and establishing a scalable utility pattern for other developers.
- Refactored several legacy components in alignment with established architecture and best practices, improving performance, readability, and consistency across the codebase.
- Facilitated technical discussions with senior developers and principal engineers to help solve recurring issues.

Junior Software Engineer — Metalinguist LLC *Feb 2023 – Dec 2024*

React · Node.js · JavaScript · AWS · DynamoDB · MUI

- Built dynamic data visualization components for administrative and client dashboards, improving data accessibility and reporting.
- Implemented Google OAuth 2.0 authentication using react-oauth/google, enabling secure single sign-on for client portal users.
- Designed DynamoDB query logic for field validation, eliminating duplicate entries and strengthening data integrity.
- Delivered new features using functional components, higher-order functions, and React hooks.

SIDE QUESTS

Finance Manager Pro (*Next.js · Firebase · Vercel*)

- Actively developing a modern, family-oriented finance dashboard featuring a liquid glass, responsive UI and real-time data visualizations for tracking shared income and expenses. The platform includes dynamic live charts, full CRUD functionality for financial records, customizable expense categorization, and exportable reports for deeper insights.

NYXCraft.live (*PaperMC*)

- Actively developing a dedicated Minecraft server with active users, implementing permission systems, world-control plugins, gameplay infrastructure website/social platform, and live gaming statistics tracking portal behind paid month subscription tier.

SECURITY AWARENESS & SYSTEMS ADMINISTRATION

Proficient in reverse software engineering using Ghidra (NSA) for digital forensics and vulnerability analysis. Experienced with cryptographic methods including Gaussian Elimination and CRT-based modular exponentiation. Applied these skills in several academic and independent security research contexts.
